software developer

 Bhubaneswar, India  +91 82490 90782  abhiperl1000@gmail.com  <https://abhisek7154.github.io/portfolio-website/>

Profiles	 Abhisek saho	 Abhisek saho
----------	--	--

Summary	Full-stack developer with an engineering background, focused on building scalable , user-centric web applications.
---------	--

Skills	• Frontend Development HTML/CSS, JavaScript, React, Next.js, TailwindCSS • Backend & APIs Node.js , Express.js , Hono • Database & ORM • PostgreSQL, Prisma • DevOps / Infrastructure Docker, NGINX , AWS • Programming Languages Python, Rust, C++
--------	--

Projects	The Forgotten Archive Developed a full-stack blogging website using React (frontend) and Cloudflare Workers (serverless backend). Implemented secure user authentication with JWT, form validation with Zod, and database management with Prisma + PostgreSQL. Focused on performance, scalability, and type safety by leveraging TypeScript throughout the stack. Building Paytm/Wallet End to End Built a full-stack Paytm-like digital wallet using Node.js (backend), PostgreSQL (database), and Next.js (frontend) with TailwindCSS + shadcn/ui. Implemented secure user onboarding, wallet top-ups/withdrawals via bank APIs, P2P transfers through phone/QR, and merchant features including Google login, QR-based payments, real-time alerts, and automated bank settlements. GhostMSG Built with Next.js (frontend & backend), shadcn/ui for UI components, Zod + React Hook Form for type-safe validation, and NextAuth with OTP verification for secure authentication. Integrated AI features to enhance feedback analysis and provide insights from anonymous user-submitted messages. AnimeDB Developed a backend API using Node.js and Express, with Zod for schema validation, Cloudinary for media storage, and Socket.IO for real-time updates. Designed to handle anime metadata, media uploads, and live interactions efficiently.
